

Environmental Checklist (SEPA) Cover Form

OFFICIAL USE ONLY

Case #: _____ Master File #: _____ Date Received: _____
Received By: _____ Project Planner: _____ Related Cases: _____

Agency application to be attached to this:

State Environmental Policy Act- Environmental Checklist

For electronic versions, go to: <http://www.ecy.wa.gov/programs/sea/sepa/forms.htm>

Applicant: The Holt Group, Inc. **Phone:** (360) 892-0514

Mailing Address: PO Box 87970 **City:** Vancouver **St:** WA **Zip:** 98687

Email Address: will@holthomes.com

Project Name: Parkside On Cooper Point **Tax Parcel No.:** 74202800000, 74202700100, 74202700000, 74202600000

Project Address: 2200 BLOCK OF COOPER PT ROAD OLYMPIA, WA 98506

Section/Township/Range: 9 / 18N / 2W **Total Acres:** 29.99 Ac

Zoning: RLI **Shoreline Designation:** N/A **Water Body (if any):** Wetland

Initial Permit Type(s):

General Land Use Application (Preliminary Long Plat)

List of all supplemental reports accompanying this application: Storm Drainage Report, Stormwater Infiltration Evaluation, Hydrogeologic Assessment, Mudminnow Report, Wetland Report, Transportation Impact Study, Resource Protection Plan, SWPPP

REQUIRED CHECKLIST ATTACHMENTS

- Title company-certified list of adjacent property owners within 300 feet.
- All fees, including supplemental review fees.
- Reproducible site plans and vicinity map (11"x17" or smaller).
- Five copies of all supplemental reports.

Applicants are required to post the project site with a sign provided by the City within seven days of this application being deemed complete. Please contact City staff for more information

I affirm that all answers, statements, and information submitted with this application are correct and accurate to the best of my knowledge. I also affirm that I am the owner of the subject site or am duly authorized by the owner to act with respect to this application. Further, I grant permission from the owner to any and all employees and representatives of the City of Olympia and other governmental agencies to enter upon and inspect said property as reasonably necessary to process this application. I agree to pay all fees of the City that apply to this application.

SEPA ENVIRONMENTAL CHECKLIST

UPDATED 2014

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants:

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals:

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the [SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS \(part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. Background

1. Name of proposed project, if applicable: Parkside On Cooper Point
2. Name of applicant: The Holt Group, Inc.
3. Address and phone number of applicant and contact person:

Will Gruner
The Holt Group, Inc.
PO Box 87970
Vancouver, WA 98687-7970
(360) 892-0514
will@holthomes.com

4. Date checklist prepared: December 29, 2014
5. Agency requesting checklist: City of Olympia
6. Proposed timing or schedule (including phasing, if applicable):
Project would be a single phase. The start of construction is dependent on market conditions.

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

Stormwater Infiltration Evaluation, Hydrogeologic Assessment, Mudminnow Report, Wetland Report, Transportation Impact Study, Resource Protection Plan (Integrated Pest Management Plan), Preliminary Storm Drainage Report, Stormwater Pollution Prevention Plan

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.

No.

10. List any government approvals or permits that will be needed for your proposal, if known.

City of Olympia Preliminary/Final Plat, Civil Engineering permit, Building Permits, Right of Way Permits

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this

page. (Lead agencies may modify this form to include additional specific information on project description.)

Project proposes to: Clear approximately 17 of the 30 acres with an estimated 225,200 cubic yards of site grading with 71,000 cubic yards of cut material to be exported off-site, re-grade the site for 2,270 lineal feet (LF) of residential roadway and 75 single-family lots with a typical size of 5,000 square feet, utility installations include on-site water, sanitary sewer, storm drainage conveyance, three on-site stormwater infiltration/detention facilities, approximately 1,500 LF of off-site sanitary sewer, 2,200 LF of half-street improvement to Cooper Point Road, and 940 LF of full street improvement to 20th Avenue.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

Thurston County Parcels: 74202800000, 74202700100, 74202700000, 74202600000.

Project Address: 2200 Block of Cooper Point Road, Olympia, WA 98506

Section 9, Township 18N, Range 2W

Project is bounded by Cooper Point Road NW on the east and 20th Avenue NW on the south.

See Site Plan.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site:

Hilly. The high point of site is located near the southeast corner.

b. What is the steepest slope on the site (approximate percent slope)?

50%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.

Based on geologic explorations, the site appears to be underlain by weathered till underlain by a thin layer of dense glacial till. The till is underlain by advance outwash sand and gravel and underneath this layer is dense silt.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

No.

- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.

Site grading is proposed to provide level lots and access roadways. Preliminary design calls for approximately 148,000 cubic feet of cut and 77,000 cubic feet of fill on-site with approximately 71,000 cubic feet of cut material to be exported off-site.

- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Yes. Disturbed soils will be an erosion hazard. Temporary and permanent erosion control practices will need to be implemented.

- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Approximately 20% of the site is proposed to be covered with impervious surfaces.

- h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Minimizing removal of Vegetation (Tree Protection Areas), Silt Fences, Other Erosion Control best management practices as identified in the project SWPPP.

2. Air

- a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.

Dust and heavy equipment exhaust are to be expected during construction period of approximately 1-year. After construction is complete automobile exhaust typical of a residential neighborhood can be expected.

- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

No

- c. Proposed measures to reduce or control emissions or other impacts to air, if any:

Dust will be controlled during construction as required by watering or stabilizing disturbed soils.

3. Water

- a. Surface Water:

- 1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Yes. There are wetlands identified on-site on the northern part of the project and wetlands identified off-site along the western boundary of the project.

- 2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes. The wetlands have a buffer of 100-ft. Work will occur within 200-feet of the wetlands but not within the wetland buffer except as where required for improvements to Cooper Point Road NW.

- 3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

No grading will take place within wetland areas or within wetland buffers.

- 4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

No.

- 5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

No.

- 6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No.

b. Ground Water:

- 1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known.

No.

- 2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

The development will be served by the City of Olympia sewer system. No waste material will be discharged into the ground.

c. Water runoff (including stormwater):

- 1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Stormwater will be collected in permanent storm conveyance system with catch basins and conveyed by underground pipes to proposed storm detention/retention ponds on-site. Two of the three storm ponds will infiltrate storm runoff and the thirds pond will detain and release treated runoff to the existing discharge point.

2) Could waste materials enter ground or surface waters? If so, generally describe.

No. All storm runoff will be routed to on-site stormwater treatment facilities.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No. Overall on-site drainage patterns in the developed condition are designed to follow the existing site drainage basins.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

Runoff will be detained and released at pre-developed rates and either infiltrated on-site or released to the existing off-site conveyance system at pre-development locations.

4. Plants

a. Check the types of vegetation found on the site:

deciduous tree: alder, maple, aspen, other

evergreen tree: fir, cedar, pine, other

shrubs

grass

pasture

crop or grain

Orchards, vineyards or other permanent crops.

wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other

water plants: water lily, eelgrass, milfoil, other

other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Approximately 17 of the 30 acres will be cleared for roadway and lot development. Tree protection fencing will be installed to protect trees located in open space areas that will not be affected by grading.

c. List threatened and endangered species known to be on or near the site.

None.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

A landscape architect has prepared a landscape plan for disturbed areas. Native plants and shrubs are proposed.

- e. List all noxious weeds and invasive species known to be on or near the site.

None identified.

5. Animals

- a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site:

birds: Green Heron, Osprey

mammals: Big brown bat, Little brown bat, Yuma myotis bat

fish: Steelhead trout, Chum Salmon, Coho Salmon

See part b for additional details.

- b. List any threatened and endangered species known to be on or near the site.

No threatened or endangered species are known to be on the site. Per the 12-26-2014 Wetland and Stream Report prepared by EnviroVector the Olympic mudminnow (*Novumbra hubbsi*) has been identified in the vicinity of the subject property and steelhead trout (*Oncorhynchus mykiss*), which are Federally-listed as Threatened, have been mapped to occur approximately 3,800 feet north of the subject property. No salmonid species have been mapped to occur in Goldcrest Creek west of the subject property

- c. Is the site part of a migration route? If so, explain

No

- d. Proposed measures to preserve or enhance wildlife, if any:

Wetland and streams will have buffers and tracts of trees within the open space will be protected.

- e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and natural resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electrical energy will be used to meet all of the proposed residential homes energy needs.

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

No.

- c. What kinds of energy conservation features are included in the plans of this proposal?
List other proposed measures to reduce or control energy impacts, if any:

Energy efficient fixtures and construction techniques may be utilized by home builders.

7. Environmental health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?
If so, describe.

Heavy equipment will be used and there is a small risk of a fuel spill.

- 1) Describe any known or possible contamination at the site from present or past uses.

The existing two residential homes are served by septic systems and one of the houses uses heating oil but there are no known problems with the systems.

- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.

There are no known hazardous chemicals or conditions.

- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.

Fuel for construction equipment may be stored on-site during construction.

- 4) Describe special emergency services that might be required.

During construction there is the potential for a fuel spill or construction accident. After construction the residential homes will be served by standard emergency services.

- 5) Proposed measures to reduce or control environmental health hazards, if any:

Best management practices for construction hazards will be implemented during construction.

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

The roadways bounding the project site on the south and east will provide traffic noises and the cleared property east of Cooper Point Road appears to have recreational dirt bike trails which could emit vehicle noise.

- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Short term noise during construction will include heavy equipment and land clearing activities. Long term noise will be consistent with a residential neighborhood.

3) Proposed measures to reduce or control noise impacts, if any:

Construction will be restricted at night to limit noise impacts.

8. Land and shoreline use

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.

The majority of the site is undeveloped but there are two existing single family homes. The property to the west is an open space for the residential neighborhood to the west. The property to the north and south is developed with residential homes. The property to the east of Cooper Point Road is residential development on the south side and cleared land with apparent recreational vehicle trails.

The on-site homes are proposed to be demolished as part of the development, but the proposal will not affect the land use of the adjacent properties.

c. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use?

The entire site is currently zoned Residential Low Impact (RLI). The site is currently either single family residential land or undeveloped land. While the current zoning and land use is not agricultural or forest land some farming did occur on the project site in years past as evidenced by abandoned farm ponds located in the southeastern corner of the property and paths used for cattle crossings located on the property.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:

No

c. Describe any structures on the site.

Parcel 74202600000 has a single family home built in 1965 with an approximate footprint of 1,500 square feet and a 700 square foot detached garage.

Parcel 74202700000 has a single family home built in 1967 with an approximate footprint of 1,700 square feet.

d. Will any structures be demolished? If so, what?

Yes. The existing residential structures on-site will be demolished.

e. What is the current zoning classification of the site?

The project site is zoned Residential Low Impact (RLI).

f. What is the current comprehensive plan designation of the site?

The City of Olympia comprehensive land use map designates the project site for Residential Low Impact development.

g. If applicable, what is the current shoreline master program designation of the site?

The project site is not within the Shoreline Management Area.

h. Has any part of the site been classified as a critical area by the city or county? If so, specify.

Yes. There are wetlands, wetland buffers, and landslide hazard areas located onsite.

i. Approximately how many people would reside or work in the completed project?

There will be 75 residential lots in the completed project. Using the 2010 Thurston county average household population of 2.46 people/household the total project population is 185 people.

j. Approximately how many people would the completed project displace?

The demolition of the two existing residential homes will displace approximately 5 people.

k. Proposed measures to avoid or reduce displacement impacts, if any:

None.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Lot density of the proposed project meets the requirements of the current land use designation.

m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any:

Not Applicable.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

75 single-family residential units will be provided. All units will be middle income housing.

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

The two residential units being demolished are middle income units.

- c. Proposed measures to reduce or control housing impacts, if any:

None.

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

Residential buildings will meet the requirements of the RLI zoning requirements.

- b. What views in the immediate vicinity would be altered or obstructed?

None.

- c. Proposed measures to reduce or control aesthetic impacts, if any:

The project will have open space with protected vegetation along with landscaping for disturbed open areas.

11. Light and glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

The project will have streetlights and the residential homes will have standard outdoor and indoor lighting. Streetlights will be on between dusk and dawn.

- b. Could light or glare from the finished project be a safety hazard or interfere with views?

No.

- c. What existing off-site sources of light or glare may affect your proposal?

Light from roadway traffic could affect the proposal.

- d. Proposed measures to reduce or control light and glare impacts, if any:

Vegetative or manmade screening will reduce light impacts from offsite roadways.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?

The Cooper Crest Open Space area immediately west of the project site has walking trails. Grass Lake Park is located less than one mile to the southeast and offers walking and hiking opportunities. Burri Park is located less than one mile to the east and offers play areas and open space.

- b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

The project will include open space tracts.

13. Historic and cultural preservation

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe.

No.

- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.

There are trails and ponds located on-site from previous cattle farming activities. The site geology and history has been documented by a Wetland Report prepared as part of this project.

- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.

The site has been studied through site visits, conversation with nearby residents, and review of GIS data.

- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.

Clearing and grading impacts will be minimized to allow open areas to remain in their current state to the largest extent practical.

14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.

The project site is bounded by Cooper Point Road NW on the east and 20th Avenue NW on the South. The project proposes one access from Cooper Point Road NW and one from 20th Avenue NW.

- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?

Yes. There is an existing Intercity Transit bus stop located near the intersection of Cooper Point Road NW and 20th Avenue NW.

- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate?

The project proposes residential street parking and residential driveways but does not propose to eliminate any striped parking spaces.

- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).

Yes. Frontage improvements including curb, gutter, and sidewalks are proposed to the west side of Cooper Point Road NW and full-street improvements are proposed along 20th Avenue NW along the project limits.

- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates?

The December 4, 2014 Transportation Impact Study prepared by Transportation Engineering Northwest concluded that the project is anticipated to generate a total of 743 net new weekday daily vehicle trips, with 58 trips occurring during AM peak hour and 78 trips occurring during the PM peak hour.

The Primary Data and Information Sources for the study included:

- Institute of Transportation Engineers (ITE) Trip Generation Manual, 9th Edition, 2012.
- ITE Trip Generation Handbook, 3rd Edition, 2014.
- 2014 2-Hour PM Peak Hour traffic counts by Traffic Count Consultants (TCC).
- City of Olympia Traffic Count Summary Report 2000 – 2013.
- City of Olympia 2014-2019 Transportation Improvement Program (TIP).
- Highway Capacity Manual (HCM), TRB, 2010.

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

- h. Proposed measures to reduce or control transportation impacts, if any:

Traffic mitigation fees will be paid to the City of Olympia.

15. Public services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.

Yes. The development will increase the population in the area and therefore increase the need for public services. The proposed development will not be age restricted and will include households with varying ages.

b. Proposed measures to reduce or control direct impacts on public services, if any.

It is anticipated that there will be a school impact fee levied on the development of all lots. In addition to impact fees the tax base of the area will be enlarged by the proposal.

16. Utilities

a. List utilities currently available at the site:

Electricity, water, refuse service, telephone, sanitary sewer

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Water, Sanitary Sewer, Storm Sewer, Electrical Service, and Phone/Communication are proposed to be installed within the project site.

(Note: Sanitary sewer will need to be extended along Cooper Point Road to connect to the existing sewer lines located in 20th Avenue NW.)

C. Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature: Kristopher Koski
Name of signer Kristopher Koski
Position and Agency/Organization Project Engineer, KPFF
Date Submitted: 12/30/2014

D. supplemental sheet for nonproject actions

Not Applicable.
